

Energy Composites Corporation Delivers the First Composite Lift Station Retrofit Unit for the City of Baton Rouge, LA's Municipal Sewer System.

WISCONSIN RAPIDS, Wis.--(BUSINESS WIRE)--December 5, 2008. Energy Composites Corporation (NASDAQ OTC:[ENCC](#) - [News](#)) announced today that it has delivered its first municipal sewer lift station to Notoco Industries, ECC's distributor in the Gulf Coast Region, and that it supported the successful installation of the unit. The unit, 10 foot in diameter, 35 foot long and made fully out of composites, delivers substantial cost savings to the taxpayers of Baton Rouge on both an installation and life-cycle basis. ECC will begin to manufacture the next tranche of lift station orders immediately for municipalities in the state.

Sam Fairchild, ECC's CEO, noted that "ECC's design and installation technology ensures that our composite replacement lift stations will come in at an acquisition price substantially below that of the traditional concrete and steel replacement stations. In addition, Baton Rouge can expect these replacements to last for many, many years without measurable maintenance, driving further savings to the parish's taxpayers. In a time of financial pressure on municipalities, the ECC approach is a welcome relief."

Jamie Mancl, ECC's President, added that "Post-Katrina, the Gulf Coast region faces substantial requirement for infrastructure replacement, and we stand ready to provide our innovative, cost-effective solutions. This milestone represents the formal launch of our water management division, and we look forward to a long relationship with these communities as they upgrade their infrastructure over the next decade."

About Energy Composites Corporation

Energy Composites Corporation operates a world-class, automated 73,000 sq. ft. climate-controlled manufacturing facility in Wisconsin Rapids, WI, employing advanced composite materials to design, engineer and manufacture complex composite structures, vessels and processing systems for a range of clean-tech applications that include: flue gas desulfurization for power plants, infrastructure for biofuel storage and processing, wind energy system components,

infrastructure for managing waste water and drinking water storage, advanced municipal utilities infrastructure, and caustic material storage and handling systems for the petrochemical, mining and the pulp and paper industries. ECC also provides 24/7 field service crews nationwide for industrial retrofit, shutdown and maintenance, system installation and repair and inspection services. Certain statements found in this press release may constitute forward-looking statements. Forward-looking statements are based on current expectations and include any statement that does not directly relate to a current or historical fact. Such statements are generally identifiable by the terminology used, such as "anticipate," "believe," "intend," "expect," "plan," or other similar words. Our forward-looking statements in this release generally relate to our expectations and beliefs with respect to our growth and expansion activities and plans. Although it is not possible to foresee all of the factors that may cause actual results to differ from our forward-looking statements, such factors include, among others, the following: (i) unforeseen delays, costs or liabilities associated with our growth and expansion plans; (ii) our ability to successfully remediate internal control deficiencies; (iii) fluctuations in general economic conditions; and (iv) those risks described from time to time in our reports to the Securities and Exchange Commission (including our Annual Report on Form 10-K). Investors should not consider any list of such factors to be an exhaustive statement of all of the risks, uncertainties or potentially inaccurate assumptions that could cause our current expectations or beliefs to change. Shareholders and other readers should not place undue reliance on "forward-looking statements," as such statements speak only as of the date of this release. We undertake no obligation to update publicly or revise any forward-looking statements, other than as required by law.
